

Smart Building System with the IoT

Cut costs, maximize infrastructure use
and increase efficiency

Smart Building System with the IoT

Meet the increasing demands of your commercial building with significant reduction in energy consumption and maintenance costs. The Smart Building System from Softweb Solutions helps achieve these cost reductions. The result is a safe, secure and efficient environment for your building.

- No need for new systems – Integration of existing HVAC, CCTV, lighting, and water systems
- Sensor control and monitoring – Interconnected sensors provide control and analysis
- Extend building safety – Enable authorized personnel to react quickly to safety events
- Customized software – Scenario based sensors decrease energy consumption
- Secure doors and gates – Role-based access ensures optimum security
- Eliminate human monitoring – Maintenance alerts, service schedules and fault detection
